SPECIMENT DETAILS	
Date of onset of illness	
Date of sample collection	03-03-2021
Date of receipt of specimen	03-03-2021
REPORTING DETAILS	
Sample ID	S560500157872346

S.No	Patient Name	Age	Gender	Mobile No	Specimen Type	Date of Sample Testing	Result Status
1	AARTI MOHITE	56	Female	9985444400	Nasopharyngeal swab / Oropharyngeal swab	03-03-2021	Negative

Authorized Officer : Dr.K.S.Vaisakhi

(Consultant Microbiology & Molecular Testing/Infection

Control Officer & Quality Head.)
Signature of Authorized Officer

Note :The results relate only to the specimen tested and should be correlated with clinical findings.

• Interpretation guidance:-

Testing of referred clinical specimens was considered on the basis of request / referral received from / through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP)/ any other health care facility affirming requirements of the case definitions.

- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. The repeat specimens may be considered after a gap of 2 to

4 days after the collection of the first specimen for additional testing if required.

- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of confections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director Public Health
